It is our specialty to fit glasses in such a manner that they relieve the eye strain perfectly; fitting the eye with ease and comfort, thus preserving the eye. In examining the eye only the latest and most improved methods and instruments are used. Physicians especially are invited to call and investigate our methods of correcting errors of refraction. Many cases of headache, neuralgia, nervousness, irritability, insomnia, vertigo, nervous prostration and the seeming stupidity of children are often due to defective vision caused by an abnormal curvature of the cornea or crystalline lens or to an irregularity of the refracting media of the eye, and are relieved at once upon the application of the proper glasses. Ninety percent of the people over 40 years of age need glasses, and 50 percent of the 30 need them for distance.

Glasses are not always given to improve eyesight, but to relieve undue strains; in short to assist nature. Thousands of eyes are ruined yearly. Seven persons out of ten have neither eyes alike, and one out of twenty is astigmatic; hence the necessity of testing each eye separately. Special attention is given to any inequality that may exist between the refraction of the eyes. Optical science has made rapid advances within the last few years, the correct adoption of spectacles has become a distinct profession. The optician who thoroughly understands his business realizes fully that in adjusting glasses for his customers he is treating with a most delicate and precious organ where the slightest error may result seriously, while if he does his work well, he not only gives comfort and ease to his patrons, but in many instances restores the sight.

Special care should be taken in selecting the first pair of spectacles, nor should it be attempted without the aid of a responsible optician. It is most important that the lenses should be accurately centered and of the best quality and the frames so made that the wearer looks directly through the center. Glasses nicely fitted to the face become an ornament as well as a necessity. Fitting children with spectacles is a specialty. Parents do not neglect your children's eyes.

Difficult cases solicited.

All questions in regard to the eyes cheerfully answered.

Consultation and Examination Free.

Office hours from 10 a. m. to 3 p. m. at the Graham Hotel.
